

Max von Preuschen

Full-stack developer, Freelancer

As an accomplished software developer, I specialise in API development and web services. I am well-versed in full-stack integrations and software design – creating and developing complex web and mobile applications. I am proficient in building backend infrastructure with AWS, Scala, JavaScript and any kind of data storage. Aiming to automate work processes as much as possible, I strive to find a solution to any problem but know how to stick to deadlines.
